

# DIDSBURY PIONEER

VOL XXXI. No. 34

DIDSBURY, ALBERTA, THURSDAY, SEPTEMBER 20, 1934

\$2.00 per year. 5 cents a copy.

## Town Council.

The meeting of the Town Council was held on Monday evening with Mayor Chambers in the chair. The councillors present were, Messrs. Spence, Pitt, Reiber, Fleury, Gooder and Budgeon.

The newly elected Councillor Mr. F. Budgeon was sworn in and he was appointed to fill all the committee vacancies caused by the resignation of Councillor Keith.

It was decided to grant \$50.00 to the Salvation Army for their social work and a bye-law was passed making an annual grant of \$50.00 to the Didsbury Public Library.

It was pointed out that the public library was very well patronised and also that a grant was made by the provincial government of half the cost of all new books purchased.

In the report on public works it was shown that up to August 31st \$1350.00 had been expended on sidewalk and road improvements. Practically all the labour expense on the improvement had been applied in the payment of arrears of taxes.

It was decided to sell the granaries, hog sheds and fencing on the property south of town which had been acquired by the town and the secretary was instructed to advertise for tenders for the sale of same.

Inquiries were made regarding the purchase of certain lots owned by the town with the intention of erecting buildings thereon. A committee was appointed to place a value on the property.

## Evangelical Church Notes.

The sermon subject at the Evangelical Church service last Sunday morning will be, "Practicing the Presence of God."

## Heavy Traffic to Banff Park.

Motor traffic to and from Banff national park from the period April 1 to August 31 showed a substantial increase over last year, according to figures just released by P. J. Jennings, superintendent of the park. No less than 43,972 autos passed through the park gates during the season. Of this number 22,556 were westbound from the eastern gates of the park, and 21,416 were eastbound through the east gates of the park. This represents an increase of 2,750 cars over the 1933 season.

## Alberta's 1934 Wheat Crop

The census of various estimates would lead to the belief that Alberta's 1934 wheat crop will total around 116 million bushels from 7,501,000 acres seeded. This is an improvement over last year when the production was 94,500,000 bushels according to the estimate of the federal Bureau of Statistics. Judging from the output of the 1933 crop the estimate seems to be low and possibly the actual production was closer to 100 million bushels in 1933.

The following table gives Alberta's wheat production and acreage over the years since 1919:

| Year | Yield (Bushels) | Acreage   |
|------|-----------------|-----------|
| 1919 | 34,575,000      | 4,282,503 |
| 1920 | 83,461,000      | 4,074,483 |
| 1921 | 53,044,000      | 5,123,494 |
| 1922 | 64,976,000      | 5,765,595 |
| 1923 | 144,834,000     | 5,172,643 |
| 1924 | 61,312,000      | 5,373,813 |
| 1925 | 97,962,000      | 5,347,972 |
| 1926 | 113,986,000     | 6,161,383 |
| 1927 | 171,286,000     | 6,251,000 |
| 1928 | 171,600,000     | 6,707,526 |
| 1929 | 92,534,000      | 7,551,215 |
| 1930 | 147,000,000     | 7,164,000 |
| 1931 | 136,000,000     | 7,999,895 |
| 1932 | 168,000,000     | 8,201,000 |
| 1933 | 94,500,000      | 7,898,000 |
| 1934 | 116,000,000     | 7,501,000 |

## World Wheat Carryover

The Committee of the International Wheat Agreement was informed that world stocks of wheat on August 1, 1934 amounted to 1,140,000,000 as compared with 1,120,000,000 on August 1, 1933. The average world stocks as at August 1st, during the years 1922 to 1928 was 625 million.

## Government Estimate of

### Canada's Wheat Crop

The Dominion Bureau of Statistics issued an estimate of Canada's 1934 wheat crop this week, placing the volume at 277,304,000 bushels. Last year's crop was 269,729,000 bushels.

These figures, of course, include the wheat production of all of Canada. The figure for the prairie provinces was 255,000,000 bushels, by provinces:

|              |             |
|--------------|-------------|
| Alberta      | 116,000,000 |
| Saskatchewan | 114,200,000 |
| Manitoba     | 34,800,000  |
| Total        | 265,000,000 |

## LOCAL & GENERAL

Mr. Albert Meston of Three Hills was a Didsbury visitor over the weekend.

Mr. H. P. Morgan returned on Wednesday from Ottawa where he transacted business in his capacity as the president of the Canadian Postmasters Association.

Mr. Henry Brown, of Slocan, an old time resident of the Westcott district, is looking after his interests here and renewing acquaintances with old friends.

The W.C.T.U. will hold a chicken supper in the Leuzler Block, Saturday, September 22, from five to eight o'clock. Adults 35c children 25c.

Mr. H. Baines has been transferred from Cochrane branch of the Royal Bank of Canada to Didsbury where he has taken over the duties of accountant.

Mrs. Roy Black and family who have been visiting her parents, Mr. and Mrs. Cummings for the past week, returned to her home at Bowden on Sunday.

Mr. and Mrs. G. R. Sampson (nee Kathleen Wesley), of Cadomin, Alta., visited her home and friends in the district last week. A group of 25 friends met at the home of Mrs. J. R. Cunningham last Thursday evening to visit with the guests.

Local ninards enjoyed excellent sport on the opening day of shooting season. Jim Cathiness bagged a dozen Hungarian partridge while Jack Fleury and Bill Gillette went after ducks but also managed to get a few of the tasty Huns.

Miss Ida Nettnay entertained a number of girls Friday evening last on the occasion of her 16th birthday. The evening was occupied with cards and dancing, and an enjoyable time was had by all. The evening was fittingly closed with the serving of a very tasty lunch by the hostess. The centre of interest on the table being the birthday cake.

The W.C.T.U. held a very interesting meeting at the home of Mrs. Reiber on Thursday. Mrs. Reiber, the president gave an outline of the year's work to the superintendents of the different departments. She also gave a word picture of the liquor traffic in the western States as observed by tourists. There were thirteen members and three visitors present.

At Didsbury

## Threshing Delayed

The wet weather during the last week has held up threshing operations and it is estimated that not more than 10 per cent of the threshing has been done.

The local elevator men estimate that the average yield of wheat will be about 18 bushels per acre which is considerably less than the estimate early in the season. A number of fields however have shown a yield of 25 and 30 bushels per acre.

## Hunting Season Opened Saturday

The open season for duck and Hungarian started on Saturday last and quite a number of the local ninards have been out. They report that while ducks are somewhat scarce the Hungarians are plentiful.

Dr. Clarke, Jim Cathiness, Jack Fleury and Bill Gillette had good bag while George Hawkes claims 13 Huns and 10 ducks in two afternoons' shooting.

It is reported that some so called sportsmen are encroaching on the game laws by shooting game on chicken on which this is closed season.

## Increase in Cream Deliveries

Creameries of Alberta continue to report an increase in amount of cream deliveries for this season over 1933. During the five weeks ending September 1 a total of 2,937,000 lbs. of butterfat was received, an increase of 5.3% over the same period of 1933. For the period from January to August inclusive, a total of 16,913,142 lbs. had been received, an increase of 10.4% over 1933.

## British Challenger Defeats Rainbow

T. O. M. Sopwith's challenging British yacht Endeavour Monday won the second race of the America's cup series from Harold S. Vanderbilt's Rainbow, scoring the first British race victory in the yachting classic since the late Sir Thomas Lipton's Shamrock IV won the second race from Resolute in 1920.

Fifteen seconds behind on the beat to windward the big British racer fairly ate up the breeze on the run home to administer a decisive defeat to the defender. Endeavour's margin was two minutes nine seconds.

On Tuesday Endeavour led Rainbow all around a 30-mile triangular course to make it two straight in Great Britain's fifteenth bid for the America's cup. She won by 51 seconds.

T. O. M. Sopwith, skipper of the challenger, outgunned Harold S. Vanderbilt at the starting line, crossing at a 12-knot clip.

Rainbow had preferred the weather position, but Vanderbilt was too close to the line and had to stop the defender's way in order not to beat the starting signal. The result was Endeavour shot immediately ahead after the start and was never headed again.

The Endeavour's crew handled sails promptly at all times, and this proved an important factor in the win.

The first race between the two, Saturday, was declared no contest when the time limit of 8 1/2 hours expired.

Endeavour finished at: 2:38:44.

This Changing World

Probably no period of recorded history can show such a succession of surprising and kaleidoscopic changes, political and economic, as that through which we are passing. The vast complex of peoples and nations comprising the civilized world to-day is in a state of uniformly unstable equilibrium—an equilibrium disturbed from time to time by a variety of inaugurings both major and minor. So frequent are they, so unexpected their character, so far-reaching their effects, that few even of the great among the prophets dare risk portraying the face of things to come in the immediate future. They feel safer in making (and indeed they prefer to make) their predictions at long range, and to envision a world more remote in time than that which is likely to concern much the present much-alarmed generation.

The political and economic changes which occurred during the storm years of 1914-18, the revolutionary upheavals which wrecked dynasties and brought new state forms into being, probably were larger in scale. But they were not so numerous nor, for that matter, did they strike with ruder shock than those of more recent occurrence. The protracted strain of the war itself served to dull and deaden the sensibilities of the people directly subjected to it, and, more insured to shock, they were inclined to lump all the catastrophes into one. War, they were inclined, too, to the belief that, once peace were restored, the world would quickly revert to the pre-war basis and settle anew to the ordered routine which seemed so stable until the unexpected happened at Sarajevo.

The world, however, has refused to settle down, refused to revert to the former status. The well-ordered machine which made this seem the best of all possible worlds until the summer of 1914, has never regained its old momentum. The people hanker for peace and a chance to routinize their existence. They wish to remodel the new world on something like the old lines. But peace is denied them—peace, security and comfort, the comfort which comes from an assured livelihood. All is unrest. They feel they sit upon a volcano about to erupt and are agitated by uncertainties, make them the more susceptible to the recurrent shocks which evidence the turmoil beneath. Thus the crises of the depression appear more menacing than those which occurred during war-time which stunned, rather than agitated.

Recent events in Austria and Germany are symptomatic of the times. The world looks on with anxiety while these two nations wring in their efforts to evolve a state form which can bring harmony and happiness to their peoples. Equally significant to the world at large, however, are the experiments being tried in the United States and in Great Britain to evolve a new economy which will give work to the workless and restore the prosperity both, in the past, have enjoyed. Both experiments involve complete revolutions in the national economic life of those countries, but few would agree that either yet had found the solution itself.

It is unnecessary to enumerate the many changes during the period of depression. Books on political and economic subjects become obsolete in a day. Anyone who reads knows that. Take, for example, the following quotation from a book which reached shelves of public libraries in Western Canada little more than a year ago:

"Nobody doubts, for instance, that America will overcome the present difficulties once it gets a grip on itself. France is attaining comfortability, and even Germany is held to have a fair chance. . . . But the issue is more doubtful for Great Britain because her malady seems more fundamental. Already the British Empire has fallen from its former high estate."

The picture has been entirely reversed since then. Scarcely a statement in the quotation stands to-day and that is but a sample of the dangers haunting the worldwide prophet in this dynamic, fluid world. Apparently, the unstable condition will continue until every kingdom and every alleged cure-all has been tried and tried in vain. Then perchance, a world on the verge of ruin will realize that it is not so much the medicine that is wrong as the diagnosis. Indeed, were international enmity replaced by international unity almost any kind of political or economic medicine might cure remaining ills.

## Realises Its Value

Governor-General Is Patron To Junior Farm Clubs

Club members and everyone associated with club work for farm boys and girls will sincerely appreciate the great honor that has been accorded to the junior farm club movement by His Excellency the Governor-General, the Earl of Inverchoull, who has extended his patronage to the Canadian Council on Boys' and Girls' Club Work.

The recognition that His Excellency has thus given to the value of junior club work in Canada should encourage greater activity on the part of every club member and stimulate a deeper sense of the opportunities that are provided in this form of agricultural extension.

## Criminals Steal Arms

1,927 Guns Taken From U.S. Armories Since 1932

The underworld has stolen 1,927 guns ten of them machine-guns and 22,119 pounds of ammunition from national guard armories in 29 states since January 1, 1932. William Stanley, acting United States attorney-general, gave the information.

At the same time he revealed the department of justice has asked the state governments to end these thefts. Stanley reminded that the federal machine-gun law which took effect recently, is intended to close fire arms channels to the criminal.

Bridge and bridge tournaments are regarded as gaming in England.

## Diarrhoea, Dysentery, Colic Cramps and Stomach Pains

Prompt treatment with Dr. Fowler's Extract of Wild Strawberry in such cases relieves the pains, checks the action of the bowels and thus does away with the suffering, the weakness, and oftentimes the collapse associated with attacks of this kind.

It does this by checking the too frequent and irritable effects settling the stomach and bracing up the weak and system, thus making it a remedy for the treatment of bowel complaints of both young and old.

On the market for 30 years, you do not experiment when you use it.

Put up only by The T. Millard Co., Ltd., Toronto, Ont.

## British Dominions

### Emigration Society

Secretary Returns To England After A Visit To Canada

Concluding his forty-second visit to Canada from Britain, Robert Culver, secretary of the British Dominions Emigration Society, returns on the Cunard White Star liner Ascania from Montreal.

"I am impressed," declared Mr. Culver in an interview, "with the improvement in Canadian business conditions over last year. There are many signs of material progress and a feeling of returning confidence among influential people I have met here this year. I feel that before long we shall have a greater opportunity of increasing the work of our society in the Dominion."

"The British Dominions Emigration Society was founded in 1882 by Preliminary Kitto. During these 52 years over 37,000 have been assisted to emigrate, and the feature of the work I am most proud of is that we have never charged one cent interest on the money advanced. It was not surprising therefore, though most gratifying to our society, to receive a commendatory letter from your Prime Minister, the Rt. Hon. R. B. Bennett, paying warm tribute to our work upon the occasion of our 50th anniversary. At the present time our work is almost entirely confined to the re-union of British families."

The society enjoys the high presidency of H.R.H. Princess Louise, Duchess of Argyll, and a list of distinguished vice-presidents which includes The Most Noble the Marquess of Salisbury, K.G., G.C.V.O.; The Right Hon. and Right Rev. The Lord Bishop of London, The Right Rev.

good permanent work in Canada and return to the Old Country to swell the ranks of the unemployed there, or they have to receive assistance towards the cost of the transportation.

Robert Culver and R. Gordon Burgoyne of the British Dominions Emigration Society, who returned to Britain on the White Star Liner Ascania.

The Lord Bishop of Sturtepy, The Right Hon. Lord Lloyd, The Right Hon. Lord Middleton, Sir Archibald Weigall.

The society's Canadian manager is R. Gordon Burgoyne of Montreal, the local committee includes many business and professional leaders.

Committees of similar calibre co-operate with the society in Toronto, Halifax and Saint John, N.B.

Assistance to emigrate takes the form of grants or loans made under varying conditions to suit circumstances, to British-born subjects of good character and sound health; also of advice and help to settlers after their arrival.

It has been found by our representatives in Canada," Mr. Culver said, "that large numbers of men go out, leaving their wives and families behind, with every hope and good intention of soon being able to send for them. They make good in the various cities and towns throughout Canada, but very quickly find that after keeping themselves and sending money home to help to keep their wives and families in Britain, it is utterly impossible for them to save the amount required to bring their wives and families out. One of two things is then bound to happen—either the men have to throw up their

Makes "Color-Music"

Attachment For Piano Invented By English Engineer

I. Shamah, English electrical engineer, has invented an apparatus for making "color-music," which may be used in any home as an attachment to a piano. By means of this, a drawing room may be flooded with diffusing lights which will automatically react in colors to whatever tune is played. He has so graded the vibrations of a piano in proportion to each other that each note has its own exact shade, so that it will be possible for instance, to play "God Save the King" in a combination of shades varying between red, white and blue; the "Blue Danube" in green and blue; or the "Moonlight Sonata" in yellow and silver. Another invention by Mr. Shamah enables one to "feel" music. You hold two metal tubes and when a tune is played you feel the rhythm of it like a beating pulse, which send a pleasant tingling sensation up the arms.

A Pulpit On Wheels

Sexton Places It Where People Can See Minister

In the Church of St. James, Cleveland, is a pulpit on train lines. The pulpit which existed before 1888, was very high and ugly, so it was decided to cut it down to its present proportions. When placed in a certain position in the church it concealed the altar and when in the only other suitable position, people in the gallery could not see the preacher. Now, before the sermon, the sexton pushes the pulpit on its lines to the centre of the church, and after the sermon it is pushed back again.

**OFF COLOUR?  
HOW IS YOUR LIVER?**  
Wake up your Liver Bile

—Without Calomel

Your liver's a very small organ, but it is really one of your dignities and should be kept in good order. You can't afford to neglect it. You won't completely correct such a condition by taking salts, oil, mineral water, laxatives, or anything else, or anything else. When it's moved, your health's all right—and you feel a liver satisfied.

Cutter's Little Liver Pills will soon bring back the sparkle into your life. They're purely vegetable. Safe. Safe. Safe for men, women, children. 25c at all druggists.

## Proposals To Change B. N. A. Act Will Be Considered At Dominion Provincial Conference

Proposals to change the British North America Act—Canada's constitution—will be up for consideration at the next conference of Dominion and provincial governments.

When the conference in July concluded, Premier R. B. Bennett suggested to the provincial premiers they meet again in October. This was regarded as a tentative date. It may be earlier or later but in any event it will be before the next session of parliament.

Under the B.N.A. act, social services, direct relief and similar responsibilities were placed on the shoulders of the provinces and the fields of taxation were defined as between the provinces and the Dominion with these responsibilities in mind. In view of the wider field of taxation allotted the Dominion, it was provided that the provinces be given annual subsidies from the federal treasury. These have been revised from time to time.

The depression has entailed so much relief and social assistance that it has been contended they have become national problems and should be a Dominion responsibility. The Dominion has recognized this by carrying a considerable portion of the financial load. At the last conference the Dominion changed its policy in this connection and instead of bearing a proportion of the direct relief regardless of how extensive it might be, in the future will make monthly grants of stated amounts to the provinces and the latter will look after administration without interference on the part of Ottawa.

The Dominion also contributes 75 per cent. of old age pensions paid by the provinces and there is also a movement to have unemployment and health insurance inaugurated. All these are provincial responsibilities although it is frequently argued they could be better administered as national undertakings instead of piecemeal with each province having a distinct system.

The provinces, particularly Ontario and Quebec, have been very jealous of their provincial rights and on many occasions appeals have been carried to the privy council in London or as it is commonly described "to the fact of the throne," when they felt the Dominion was infringing on their jurisdiction. Not infrequently the provinces have been successful in these appeals.

The Dominion takes the view that changes are necessary in the B.N.A. Act if it is to undertake relief and social services on a national scale. It might be necessary to change the subsidies of the provinces as well as extend the Dominion's jurisdiction.

At the conference in Jan. 1933, Premier R. B. Bennett laid down proposals in an agenda to broaden the federal powers to cope with such situations but at that time some provinces were not prepared to surrender their jurisdiction. There have been many changes in provincial governments since then.

Many are insistent that the Dominion carry a considerable portion of the load of relief because they claim the provinces are not to blame for conditions that have caused widespread unemployment. They may be more inclined to give the Dominion the power necessary to make unemployment a national obligation.

Although minor changes have been made in the B.N.A. Act, no such fundamental changes as now suggested have ever been made since the act was passed uniting the provinces into the Dominion.

### Makes Flying Automobile

An invention enabling aeroplanes to operate automatically, including the take-off and landing, has been acquired by the French Army, after a year of tests. The machine, the work of four French engineers, was said to simplify piloting to an extent which would enable a child to run a plane.

Husband: "You know, darling, that play made me think."

Wife: "Yes, it certainly was an extraordinary play."

W. N. U. 2085

### Plumb Ocean Depths

Scientists Descend 2,510 Feet Below Surface Of The Sea

Establishing a new world's record dive, Dr. William Beebe and Otis Barton descended 2,510 feet below the ocean's surface seven miles off Bermuda. The previous record they made last year was 2,200 feet.

Darkness "blacker than the blackest night" and lights of deep-sea fish "like stars gone mad" were described by the divers after they emerged from the New York Zoological Society's bathysphere, a two-ton spherical diving apparatus invented by the two men.

After sailing out of St. George's on their tender, Dr. Beebe and his companion were sealed in the sphere and spent two hours and 51 minutes under water. Three hours and 19 minutes elapsed from the time they entered the metal ball until they crawled from its narrow entrance. For half an hour the scientists remained at the record depth.

The descent required an hour and 26 minutes.

Owing to the impossibility of pumping air into the sphere at such depths, the scientists had two tanks with sufficient oxygen for six hours. Only one was used and its supply lasted until the metal ball had risen to a point of 50 feet below the surface.

At the lowest depth a short motion picture film and a number of "still" shots were taken by means of a special powerful light. Dr. Beebe reported he saw more large species of fish than during any of his previous dives.

Constant telephone communication was maintained between the tender and bathysphere.

### Could Handle It

A hot heckle out in a small town called Kean City, and the local constable waited the sheriff to send him. In a short time the official arrived.

"What?" said the constable, "just you, only one man?"

"Well," answered the sheriff, "there's only one riot, isn't there?"

There is a fine of \$250 for digging up a rare Tumbao plant of West Africa, a plant which grows only two huge leaves in its lifetime.

### Built In Record Time

Big Swimming Pool At Wembley Is Almost Finished

The Empire swimming pool at Wembley, England, now practically completed, is in many respects a world's architectural curiosity.

The building alone covers two acres of ground and is entirely of reinforced concrete. It has no steel girders and its 210-foot roof span—80 feet bigger than the main hall at Olympia—rises to a height of 90 feet without a pillar to support it.

It is erected on the cantilever principle—the first time such a feat has ever been attempted. Five and a half inches are allowed in the roof for expansion and contraction.

There are two acres of glass, and outside that two acres of ground for sun-bathing. It is the largest covered bath in existence, though its 200 feet by 60 feet looks almost insignificant, sunk in the floor of the vast hall. And one end it is ankle deep and at the other there is 16 feet 6 inches of water.

The pool holds 700,000 gallons of water and takes seven nights to fill. An apparatus for raising waves send surf up the steps on to the broad sides where bathers may sit and be swept by breakers as on a beach.

The filtering plant is the biggest ever, too. It will filter, sterilize and return 700,000 gallons of water every four hours. Port lights under the water illuminate the pool.

There are restaurants, bars, shower-baths and a flooding chamber. The normal 5,000 seats can be quickly increased to 8,000, or to 12,500 for a boxing match. In the winter the pool may become a vast ice rink.

It has all been built in record time to house the Empire Games aquatic, boxing and wrestling events.

### Grasshoppers Destroyed

Vast Numbers Drove From Ravages Of Parasite Fly

Nature has laid the hand of death on millions of grasshoppers in the Sullivan Lake area in Alberta. Government experts report finding vast numbers dead from the ravages of a parasitic fly which lays its eggs in the body of the grasshoppers.

The dry bed of Sullivan Lake had proved a great breeding ground out of which they flew and did immense crop damage. It was covered with wild clover which provided their first food, then they turned to grain fields as the drought progressed.

The antlers of some Alaska moose have a spread of over 70 inches.

## United Empire Loyalists Recently Celebrated The 150th Anniversary Of Canadian Exile

### Kemalist Government

Is Fighting Illiteracy

Great Progress Has Been Made In Turkish Education

Illiteracy is being combated by the Kemalist government. According to the last census, in 1927 only 10 per cent. of the Turkish population was able to read. It is estimated that, at present, about half of the population is literate.

Aside from normal school activity, progress is chiefly due to the work of adults' evening schools, which were organized when the Latin script was introduced four years ago. Education in the army, where the young recruit is acquainted in a course of three months with reading, writing and arithmetic, also has done much to diminish illiteracy.

Primary education is obligatory. Great stress is being laid in all schools on physical culture for boys and girls alike.

Education is free of charge and even in government boarding schools no fee for the maintenance is made.

Internal reforms of Hukmet Bay, energetic minister of education, leave no doubt that it is not the facade only which is being changed. He has ruthlessly dismissed more than thirty professors of Istanbul University as not corresponding to modern standards of science.

Most of them have been replaced temporarily by foreign scientists. Other experts have been invited from abroad to serve in high and secondary schools.

### New Machines For Mines

Pit ponies doomed in their work are now being replaced by electrical apparatus in the British Isles. The new machines have so many advantages over the game little animals which spend all their lives in darkness that many orders for it are being received from abroad.

### Just A Deadlock

Enemy of the Manoeuvre—"You are my prisoner."

Sergeant Blinks—"Nonsense! How did you get here?"

Enemy—"Over the bridge."

Sergeant Blinks—"Then, my dear fellow, you are drowned. We blew up that bridge yesterday!"

### CANADIAN HORSES SHIPPED TO BARBADOS

Seventeen Canadian half-bred saddle horses are en route to Bridgetown, Barbados, British West Indies, consigned to the Inspector General of Police for Barbados. This is the second purchase of Canadian saddle horses by the Government of Barbados for its police force within a year. The horses in the picture are all bays, browns and chestnuts and stand from 15 hands 2½ inches to 16 hands high and were sired by thoroughbred stallions.

The intensive efforts of the Dominion Department of Agriculture in the past in creating breeding stations for horses, particularly of the saddle type, are now being duly appreciated by other nations, and it would appear that at last a great horse industry may arise from the foundations so well and truly laid by the Dominion Livestock Branch, by the experimental farms, and other associated divisions of the department. Recently there have been several shipments of horses abroad. Seventeen Canadian half-bred saddle horses have just arrived at Bridge-

town, Barbados, British West Indies, for the Barbados police. This shipment constitutes the second purchase of Canadian saddle horses by the Barbados government for its police force within a year. Several months ago 15 horses were shipped and gave such eminent satisfaction that the additional order referred to was the result. The second shipment to Barbados was purchased from the breeding stations at Alisa Craig and Brampton, Ontario. The horses are bays, browns, and chestnuts, standing from 15 hands 2½ inches to 16 hands high and sired by thoroughbred stallions.

Several inquiries have been received

ed during the past few months from other countries for various types of horses raised in Canada. A few weeks ago 18 draft horses were sent to Scotland where they have given the utmost satisfaction, particular notice having been taken of their excellent all-round appearance. Nine of these horses, all grade Percherons, were from Western Canada, having an average weight of 1700 lbs. Ten of the horses, three of them Clydesdales, hailed from Western Ontario, the heaviest horse being 1920 lbs. About the same time a trial shipment of 12 Clydesdales was shipped to Chester, England, and recent satisfactory reports have been received.

Readers of London newspapers have had a "refresher" on American history, particularly as it relates to the United Empire Loyalists of Canada. The occasion arose with the publication of a new item that the "American Loyalists" had celebrated the 150th anniversary of the "exile of their ancestors in Canada."

The Morning Post on request has received an explanation from the United Empire Loyalists' Association of Canada reading in part:

"During, and more especially at the close of the American Revolutionary War there was such a spirit of vindictiveness and intolerance exhibited toward those who had been either in deed or in spirit loyal to the British crown that many thousands were forced to leave their homes and possessions and seek shelter in Canada and elsewhere.

"At the treaty of peace, 1783, their banishment and extermination was a foregone conclusion, and the bitterest words ever attributed to George Washington were in reference to the loyalists. 'He could see nothing better for them than to recommend suicide.'"

"The exact number of these exiled loyalists is unknown; certainly more than 50,000 went to Canada, and it is an error to suppose that Canada was the only country to which they migrated. The loyalists from all quarters of America embarked for England, Scotland, New England, Cape Breton Island, Bermuda, Bahamas, Florida and Jamaica.

"The loyalists were by no means all of English or British descent. They contained large numbers of New York Dutch, the descendants of the founders of New Amsterdam and Albany; German, Palatine, whose ancestors settled in Pennsylvania. There were descendants of the original Swedish settlers of Rhode Island and of the French Huguenots of New Rochelle. There were large numbers of Quakers, the Highland Scotch settlers of Sir William Johnson and the Mohawk branch of the Six Nations.

"The descendants of these loyalists now reside in all parts of the Dominion, proud of their British tradition and proud of the 'Mark of Honor' bestowed upon them by His Excellency Lord Dorchester, the governor-general of the province of Quebec, and confirmed April 6, 1796, by proclamation of His Excellency John G. Simcoe, lieutenant-governor of Upper Canada.

"These loyalists who have adhered to the unity of the empire and joined the royal standard before the treaty of separation in the year 1783, and all their children and their descendants, by other sex, are to be distinguished by the following capitals added to their names: U.E., alluding to their great principle, The Unity of the Empire."

### Gasoline Problem

Tests Show That Efficiency Varies Under Different Conditions

A three-year study of service station gasoline, revealing its "test" efficiency varies from week to week, even day to day, and from station to station, was made public recently at Walker Laboratory, U. S. Government Polytechnic Institute in Troy, N.Y.

The variations were found in the same brands of gasoline, from causes all or mostly outside the manufacturer's control and due to storage, delivery, weather and the heredity of the gasoline. The study showed the changes may be sufficiently great to affect car performance, but probably not enough for the average motorist to notice.

They disclosed new "kinks" in the gasoline problem and indicated there has been a broad improvement in motor fuels, in that they increasingly approximate the car needs for which they are made.

It was explained that some of the gasoline escapes by evaporation and the trust portion that is left is a very sticky stuff which affects the "test" rating.

We don't know what the world is coming to but wish it would come too, says the Brandon Sun.

**Bank of Canada Shares.**

Shares of the Bank of Canada, to the amount of \$5,000,000 are offered for public subscription by Honorable Edgar S. Rhodes, Minister of Finance. The shares are of \$50.00 each and are offered at par. Not more than 50 shares may be held by any one person, and only persons who are British subjects ordinarily resident in Canada or Canadian corporations controlled in Canada, may own stock. These provisions will ensure a widespread interest in all parts of Canada in the sale of the stock of an institution to which Parliament has entrusted wide powers and responsibilities affecting the financial and economic welfare of Canada.

The Bank is authorized to pay cumulative dividends from its profits, after provision for expenses, depreciation, etc., at the rate of 4½ per cent per annum, payable half-yearly, which is considered to be an attractive return in comparison with ruling interest rates on high grade securities. Surplus profits are to be applied to the rest fund of the Bank or paid into the Consolidated Revenue Fund as provided by the Bank of Canada Act.

The subscription list will open on September 17th and close on or before September 21st. The shares are being offered simultaneously in every part of Canada on the 17th instant and whether or not the list is closed before September 21st, consideration will be given to all applications posted not later than midnight of the day on which the list is closed.

Subscriptions are to be mailed direct to the Minister of Finance, Ottawa, and must be accompanied by an initial payment of \$12.50 for each share and by a statutory declaration which forms part of the application form, evidencing the eligibility of the applicant to become a shareholder. The balance of the subscription price, \$37.50 in shares, will be payable on January 2nd, 1935, on or about which date the Bank is expected to commence operations.

The official prospectus and application forms are obtainable from post offices, banks and other financial institutions.

One of the important functions to be performed by shareholders is the election of seven directors who, with the Governor and Deputy Governor of the Bank, form the Board of Directors who will super-vise and control the conduct of the business of the Bank. The seven directors are to be elected from diversified occupations, as follows:

Two, whose chief occupation is in primary industry.

Two, whose chief occupation is in commerce or manufacturing.

Three, whose chief occupation is other than in primary industry or commerce or manufacturing.

In the by-laws of the Bank, which have recently been promulgated by the Governor in Council, provision is made for the nomination of directors by shareholders and for notice of such nominations to be mailed to each shareholder prior to the shareholders meeting. For the convenience of those who cannot attend meetings, provision is made for the registration of their votes in accordance with written instructions.

**Burnside Notes.**

Mr. Charlie Miller has been laid-up with blood-poisoning in his hand.

Mr. Dick Metz of Bergen, spent Sunday at his home here.

Mrs. Hugh McLean returned on Tuesday evening from a three week's trip to the coast.

Misses Bertie Metz, Edna Sittler, Margaret Coyne and Dick and Fred Metz and Al Dedels spent Sunday evening with Miss Gretta Metz at Bancroft.

Mrs. A. B. Dyck who has been laid-up with blood-poisoning in her hand, we are glad to say is much improved.

Fred Metz and Bill Wulawka were Sunday dinner guests at Mr. N. Eckel's.

Lone Pine W.I. met at the home of Mrs. Bert Pross on Thursday afternoon last. In spite of the inclement weather there was a good turnout of members and visitors. Mrs. Jack Elliott gave a splendid paper on "Canadian Industries." Mrs. B. Woods was appointed Hospital Aid Convener.

The institute plans holding a hard time dance in Lone Pine Hall on Friday, October 5th.

(held over from last week)

Mr. Fred Metz was a Sunday supper visitor at Mr. N. Eckel's.

Born: On Thursday September 6th, to Mr. and Mrs. Sam Elliott, a son, Robert George.

The grade of wheat in this district is excellent but the yields are rather disappointing.

Messrs. Fred Doll, Charlie Miller and Sam McAllister were Sunday dinner visitors at Mr. N. Eckel's.

Miss Ann Williams, who spent the summer in Grande Prairie and who is now enroute for the coast, was a Sunday visitor with Mrs. N. Eckel.

**LOST**

Will the person who picked up the Spare Tire and Rims, 5 60-19, outside E. K. Cullen's gate, please return same. (88p)

which they may give to the Minister of Finance.

One of the first steps to be taken in the organization of the Bank, after the stock has been subscribed, will be the nomination and election by shareholders of the first Board of Directors.

**Alberta Asks Better Rates**

Better freight rates on grain and grain by-products will be asked for in behalf of Alberta at a hearing before the railway commission in Ottawa September 26, to which A. Chard, provincial supervisor of freight rates, will go as a representative of the government.

Specifically, Mr. Chard will submit a case for the immediate adjustment of domestic rates on all grades of grain, flour and mill-feed to British Columbia, such rates to be on a parity with domestic rates now in effect from Fort William eastward, and for a special rate on case grains to points in Eastern Canada for at least one year. A request will also be submitted to the Dominion government for a bonus, at a reasonable rate, on all summer-fallow land in 1934 cropped to coarse grains.

**Canada May Curtail Shipments of Bacon To Mother Country**

Canada is sending too much bacon to Great Britain to satisfy the wishes of the British government considering its relations with other bacon-producing countries, and a hint has been received by the government here that indication of the volume for a while would be welcome.

It is understood that Great Britain made an estimate of bacon requirements and what would be secured from each source of supply, including the Dominion and also the Scandinavian countries.

While the quantity exported from Canada is well within the quota of the agreement, it is understood to exceed the proportionate estimate, causing the other countries to get less than their allotment. The question is being considered.

**Birds Plentiful Near Red Deer**

Great sport is anticipated in the Red Deer region by hunters this year. Ducks are reported to be in good numbers on all available ponds and lakes, while the little grey partridges have never been so plentiful as they are this year.

Duck hunters will likely drive fifty or sixty miles to the slough country east for their best sport this year, all the smaller potholes around there having been dry during the summer, forcing local birds to concentrate on the larger lakes and along the rivers and streams. A good crop of the hefty mallards is reported on the lakes, and already the birds seem to be gathering in sizeable flocks to wing out to the grain fields for feeding. Spoonbills and teal are also reported numerous.

**Alberta Government To Buy Cattle.**

Between 7,000 and 8,000 head of surplus cattle will be bought by the provincial government from farmers in the drought area, taken to central points and there disposed of. A price of one cent a pound will be paid, and the business will be handled by the department of agriculture.

This decision of policy, announced by Hon. F. S. Griesdale, means that Alberta will not be coming under the scheme recently arranged and announced by Hon. Robt. Weir, federal minister of agriculture, which contemplated the processing of the cattle into export beef and tallow.

Mr. Griesdale says that the details of the new provincial plan are not yet complete, but are now being worked out and will be made public shortly. The buying and selling will be done with the co-operation of the Dominion government and the railways in respect to freight rates on the cattle.

**WEEKLY JOKE**

"I wonder what people will wear in heaven," said the wife.  
"I suppose you will want the most expensive things, the same as here on earth," retorted the grouchy husband.  
"That need not worry you," she meekly replied, "you won't be there to pay for them."

**KNOX UNITED CHURCH NOTES**

Service at Westcott 10 a.m. Knox Church 7:30 p.m. The service on Sunday will be taken by an Oxford Group team of Calgary. The team will be in the church during Sunday afternoon, when they will hold an informal discussion in the work of the Group. Everybody welcome.

**Mountain View Notes**

(held over from last week)

The reckless individual who took too short a turn Sunday morning when leaving the Hall grounds after church service wishes to apologise to the Hall Board for acting so discourteously as to knock down a fence post, and will see that the damage is rectified as early as possible and hoping no inconvenience was caused. Also many thanks to all the gentlemen who came to the rescue.

**Bike Riders Who Pass Stop Signs Must Pay Penalty**

Stop Signs on city streets really mean "Stop"—even for bicycle riders.

James Allen had that fact impressed on his mind Friday morning, to the tune of a \$2 fine, when he appeared before Magistrate Davidson in city police court.

Allen, so the court was told, blissfully rode his bicycle against a red light. There were no accidents, but there might have been. Allen admitted the offence.

Police state that bicycle riders hurtling past stop signs and into intersections against traffic lights provide one of the major problems in preventing accidents.

In future the two-wheeled machines will be just as liable for prosecution as their four-wheeled relatives.—Calgary Herald.

**To Discuss Health Insurance**

A general meeting of representatives of various organizations in the province, to discuss the legislative committee's report on health insurance, will be held in the medical building at the university in Edmonton, on Friday, September 21. The meeting is being held in order that the public may be fully informed regarding the proposals recommended by the legislative committee with respect to a plan of health insurance. Delegates from representative groups in the province will be in attendance, but it is announced that any one interested will be welcome. It is hoped that Mr. Hugh H. Wolfenden, consulting actuary to the Canadian Life Insurance Companies' association, will be present at the meeting, as he is to be in the West at that time. Mr. Wolfenden is an internationally known actuarial authority.

## WORLD HAPPENINGS BRIEFLY TOLD

Hon. Irene Parby has been sworn in as minister without portfolio in the Reid government.

The Soviet Union has named M. Otravinski as its minister to Roumania. Recognition of the Soviet by Roumania came a few weeks ago.

A gold rush has developed north of Grand Marais, Minn., in Ontario, where a vein has been struck which has yielded \$1250 worth of the precious metal to the ton.

In accordance with a wish expressed in his will, only six words appear on the tomb of President von Hindenburg. They are: "Paul von Hindenburg 1847 to 1934."

Old King Winter opened his 1934 assault on Aug. 14 at Horneypark, Ont., when a high north wind brought with it intermittent snow flurries, at a temperature of 40 degrees above zero.

China exacted retribution for the murder of Dr. J. H. Ingram, 57-year-old American missionary, by bandits two months ago, when the provincial government executed five Chinese convicted of the crime.

The first studio in India for production of sound pictures has been opened at Calcutta. American equipment that can be moved about for production of news reels is being used.

Demand for denunciation of the Washington naval treaty before December 31, 1934, was voiced by high Japanese naval officials, including Minister of the Navy Admiral Osami, according to reports received from Tokyo.

Premier Mitchell F. Hepburn, of Ontario, renewed his demands for monetary reform before a meeting in honor of Hon. Dr. Leonard J. Simpson, minister of education, and declared Australia had practically settled her economic problems, so Canada could do the same.

## Little Journeys In Science

### AMMONIA

(By Gordon H. Guest, M.A.)

Ammonia is a colorless gas which has a characteristic, pungent, powerful odor. It is about one-half as heavy as air and is very soluble in water. Ammonia gas is easily changed to a liquid. At ordinary temperatures a pressure of about 60 pounds per square inch is sufficient to liquefy the gas.

Ammonia will neither support combustion nor burn in air. Although inactive when dry, ammonia will, in the presence of a small amount of moisture, react with acids to form substances known by the chemist as ammonium salts. For example, on mixing the fumes of hydrochloric acid, which is known commercially as muriatic acid, with ammonia a heavy white cloud of ammonium chloride is formed.

Liquid ammonia is used very extensively in making artificial ice and in producing the low temperature required in cold storage plants. This use of ammonia depends on the fact that it can easily be liquefied at ordinary temperatures by applying pressure. When the pressure is released the liquid ammonia evaporates, absorbing a great deal of heat from the surroundings. This evaporation usually takes place in pipes surrounded by a solution of salt which is not easily frozen. This cooled salt solution may be piped to a cold-storage room, or cans of fresh water may be immersed in it to produce ice.

Ammonia gas is very soluble in water and is therefore usually sold in water solution under the name of "aqueous ammonia," which is used as a cleanser both in the home and in the industries. Large quantities of ammonia are used in the manufacture of fertilizers, and in making ammonium compounds such as smelling salts.

Alkaline ammonia, unlike those of the Pacific, do not die after spawning.

Tarush can be cleaned from copper and brass by using buttermilk.

## Christmas Seal Campaign

A.C.T. To Aid Saskatchewan Anti-Tuberculosis League In Worthy Effort

The Associated Canadian Travelers, with a membership of close to five hundred, and clubs in five of the leading cities of the province, have joined forces with the Christmas Seal Sale committee of the Saskatchewan Anti-Tuberculosis League and their entire membership for two months this fall will boost the sale of sheets of these cheerful little stickers, the revenue from which is accomplishing such gratifying results in the prevention of the spread of tuberculosis in Saskatchewan.

This alert organization, being desirous of associating itself with some humanitarian cause in which every member could actively participate, has determined to make this effort a real success. Its membership in five of the leading cities of the province have wholeheartedly signified their approval of the Christmas Seal Sale as a major activity, and on September 1st will initiate a campaign that is designed to enlist the support of the entire business community of the province.

While the generous manner in which wholesalers and retailers have supported the Christmas Seal Sale in the past is fully realized and appreciated, it is also felt that the response would be much greater if the purpose of the sale was fully understood and that a larger group of people would be reached by a canvass such as the Associated Canadian Travelers have volunteered to make. Personal contact means a great deal in any effort and this will be provided by the A.C.T. members each of whom will be supplied with a pamphlet giving full information regarding the work of the Saskatchewan Anti-Tuberculosis League and the all important preventive work that is made possible by the sale of Christmas Seals.

The information contained in this pamphlet is of vital interest to every resident of Saskatchewan. Here are some of the facts in a nutshell:

The tuberculosis death rate in Saskatchewan has been reduced 25 per cent. in the past four years.

The cost of treatment in Saskatchewan Sanatoria was over \$200,000 in 1928 but in 1932 it was \$120,000.

Since preventive work was commenced in 1928, a total of 29,675 persons have been examined at the expense of the Christmas Seal Preventive Fund.

Proceeds from the sale of Christmas Seals provides the funds for preventive work. This discloses cases in their early stages and prevents recovery more certain and reducing the period of treatment and the cost to the taxpayers.

The money raised by taxes for the maintenance of the three Saskatchewan Sanatoria is for treatment only; the money for preventive work is raised by the sale of Christmas Seals. Prevention of tuberculosis and the prevention of the well from infection is equally as important in the fight against tuberculosis as the cure of those suffering from the disease.

During 1932 there were three hundred deaths from tuberculosis in Saskatchewan. During the past six years one-third of all deaths from infectious diseases in this province have been due to tuberculosis. It is now the most fatal of all infectious diseases.

The education of everyone regarding the control of tuberculosis. The provision of clinics for the examination of all persons having symptoms of tuberculosis, who are suspected by their family doctors of tuberculosis. Among 7,329 persons suspected and referred by physicians to clinics, sanatoria and consultants during the past five years 808 active cases were discovered.

The sale of Christmas Seals is a

benefaction which appeals to every-

one who desires to support a humani-

tarian cause, and through the efforts

of the members of the A.C.T. a great

many more people will this year be

afforded an opportunity of contributing

thereto.

## Survey Of Accidents

Record Shows 22 Is Dangerous Age For Motor Driving

The dangerous age for automobile drivers is 22. This is the information contained in a statement issued by the governor's committee on street and highway safety following a three-year study of automobile accidents in Massachusetts.

For all operators licensed approximately one-seventh are 22 years of age or under. Of operators involved in fatal accidents about one-quarter are 22 or under, according to the highways committee's statement.

"In proportion to the smaller size of this group," the committee's statement reads, "its accident record is enough worse than the performance of the older class to warrant special attention."

According to the Smithsonian Institution, there have been no major changes in outlines of the central and continents since earliest times.

## LIGHT

By MANLEY F. MINER  
Son Of Jack Miner, Canadian Naturalist

While walking quietly through an evergreen grove recently my attention was drawn to the fact that the trees had grown tall and rank, and as the soil was very rich in food for such trees they were very thick all growing straight up for light. Each one trying to poke its head out above the other, but on close examination, all the lower limbs were dead while the tops of the trees were dead while alive. And what was the cause? On close investigation it was revealed

Yes, man might be alive bodily but be completely dead spiritually, and unless he keeps in tune with the God, he is bound to die gradually, the same as the tree does, limb by limb as it misses the light. After having this thought come to me, as I was alone with Nature, walking through this grove, I went home, and as I love to play my violin, I picked it up, only to find it out of tune. Like all other string instruments they get quickly out of

## Not What They Seem

Many Things Have No Association With Their Name

Cork legs are not made of cork. They are made of wood, metal, leather, or strong canvas; they were invented by Dr. Cork. Hackney caskets are not so called because they were first made in Hackney, London. The word comes from the French "Haquene", meaning an ambling horse. Hair pipes are not made from the roots of the sweet brier. The name is derived from the French "Bruyere" meaning heath. Dark blue and light blue are not the colors of the Universities of Oxford and Cambridge respectively. A university has no colors. But members are entitled to wear the university livery. Dark blue and light blue are the colors of the athletic clubs of Oxford and Cambridge. A laughing jackass is not an animal; it is a bird. Bird calls do not wear a glass slipper. She wore a fur slipper for the original French words were "Pantoufle en cuir" and the sound was mistaken for "Pantoufle en verre"; thus "fur" was changed to "glass".

## Western Musical Development

Easterners Has Kind Words To Say Of Progress Made

Leo Smith, noted Canadian musician, who has just returned to Toronto from a Western Canadian visit, declared that "a visit to the west is an education." He said music endeavor in the west was already "productive of surprisingly good results."

"It is gratifying to note," he added "that the musical boundaries are not confined to the cities." He said while in Saskatoon persons journey from many country points to attend the music examinations.

"The results seemed to show a keenness, vitality, even at times a spontaneity, which, to my way of thinking, rather overshadowed performance of corresponding grades in the east," Mr. Smith said.

## Luminous Human Body

Story Comes From Greece Of Strange Freak Of Nature

Another luminous human body engrossing scientific attention occupied columns in the Athenian press, recently.

Anastasis Economos, a mailman at Saloniki, is the subject of this recent discovery. In Italy recently a woman whose body was seen to give light while she slept was placed under observation in Rome. But she failed to respond.

Economos' body was said to give out sufficient rays to light a dark room.

Jack Miner and Rev. W. A. "Bilby" Sunday, the Evangelist. Photo taken on a recent visit of the famed naturalist to Jack Miner's home.

—That these limbs and lower branches were not getting light. Light that everything needs. Thus, without light these lower shoots from the trees were dying one by one because God's plan is that anything that lives must have light and heavenly food continually or else they die and perish. And as I looked I thought of how this same example could apply to humanity. If we don't accept light and keep in tune with the infinite God, Nature, or whatever you have a mind to term it, we soon die.

—by the action of the atmosphere. No matter how good your violin may be, it needs to be tuned every day and many times a day. The same can be said of man. The wear and tear of life and the demoralizing atmosphere he often comes in to which sin creates, so affects his disposition that he needs to be brought into harmony with God, in tune with God every day and many times a day.

Thus man cannot live on bread alone, he must have Light and be kept in tune with God between meals.

## Were Good Spellers

Secretary And Teacher Defeated All Others In Match

A spelling bee was won in New York by two women who were victors in the annual Town Hall Club spelling bee. One, a private secretary, and the other, a school teacher, defeated a university professor, an editor, a foreign correspondent and a dozen others. They were Miss Lou Henshaw, the teacher, who was the first of the two sections by spelling "polyphony" and "plagiarism," and Miss Elma Keiley, the private secretary who won on "neophagus."

Since becoming an independent state in 1831, Belgium has had but four kings.

## Sea Serpent Is Sighted

Commander Of French Liner Encounters Sea Monster In Azores

Commander Sylvestre, of the French liner Cuba, officially reported to his company that a sea-serpent had been sighted from the Cuba 800 miles northwest of the Azores.

A quartermaster and two sailors corroborated the statement. The monster was from 80 to 85 feet long, shaped like a huge lizard, with a long neck topped by a tiny head, and it had two humps on its back.

It was visible, Commander Sylvestre stated, for about 30 seconds, making four leaps out of the water each time turning its head as though to view the ship.

## HOW TO KEEP COOL

Take an effervescent glass of pleasant-tasting Andrews Liver Salt when you begin to feel the heat. You will feel cooler—and you'll stay cooler. Andrews not only quenches thirst, but cools your blood. Taken occasionally—say twice each week—Andrews will keep you fit by purifying your system and insuring regular and complete elimination. At all drug stores. 1c, 10c and 50c. New, large bottle, 75c. Sole Agents: John A. Huston Co., Ltd., Toronto 26

## OCCASIONAL WIFE

By EDNA ROBB WEBSTER  
Author of "Joretta," "Lipstick Girl" Etc.

### SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, desiring to live their own lives. But Peter is a young, struggling sculptor trying to win a commission. Peter has a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of finding an agency job. Others in the story are: Avis Werth, Peter's first love; Sylvia Todd, Peter's friend; and Gus Mason, his former roommate with whom he has quarrelled. After a party at which Peter meets the rest of the members of the party go to a cabaret to continue the gossip. Peter and Camilla are alone on the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses, and they quarrel. Camilla has gone from the studio. Avis Werth calls and persuades Peter to accept a loan of \$1,000. Peter tells her his exhibit and asks Avis and Sylvia for suggestions as to a name for it. Camilla suggests "Eager Youth" and Avis "Inspiration." Peter adopts the latter title and Camilla, heartbroken, goes to Peter's studio for quiet and to think. Peter and Avis quarrel later, and as the lights are turned on, the studio has been shattered to pieces. Avis accuses Camilla of doing this, and Camilla, stunned by the disaster and hurt and horrified by the accusation, faints.

At Camilla's suggestion, Peter enters as his exhibit a statue he had sculptured especially for her as a wedding gift. They named it "Lure of Hope." Camilla's advertising campaign and tiny Peter's broadcast was a great success, and Mr. Hoyt expressed his pleasure and surprise on learning that Camilla was the author and artist who was so ably stimulating business for his company.

Peter's exhibit was awarded the Paris scholarship, and he prepares for his journey to France. After the ship's departure, Peter writes to her, and she is on his way to his cabin when he meets Avis Werth.

(Now Go On With The Story)

### CHAPTER XVII

Before Peter could recover from his surprise enough to speak, Avis smiled serenely and exclaimed, "Surprise, Peter!"

"Well, hello," he replied with a note of consternation in his voice. "You do have a habit of appearing at the most unexpected times and places."

"And aren't you glad to see me?" she asked in a hurt voice.

"Why, of course," he was rallying to the exigency of the moment. "As a matter of fact, I was just now heading for my cabin and wondering what I was going to do with myself on this slow-going craft for a whole week. But why in the world are you travelling on a tub like this?"

"To see that you are not lonely," she replied coyly.

"That is most considerate of you," he offered gallantly.

## MATURITY—MATERNITY MIDDLE AGE

At these three critical periods a woman needs a medicine she can depend on. That's why so many like Lydia E. Pinkham's Vegetable Compound. 98 out of 100 say, "It helps me." Let us help you, too.

## LYDIA E. PINKHAM'S VEGETABLE COMPOUND

LY 24 U. 2060

"Oh, but I had a selfish reason, also. I didn't want to be lonely on another boat, you see. A week with a good travelling companion can be much shorter than five days alone."

"But I didn't know you had planned to go to Europe, now."

"Neither did I until two days ago, and you were so busy with your own affairs that I just decided to make it a little surprise to you."

"No doubt about the surprise," he admitted. "What's your destination, Paris?"

"Oh, yes. Always Paris. I travel here and there about the continent when I am over there, but Paris is always home to me. You are still wondering why I am going. It happened this way: I was talking with Professor Drake the other day and he said that in his opinion my talents lie in portrait work, and that the very best thing I could do was to study with Monsieur Boule in Paris. In my enthusiasm, I decided to go at once, and then hit upon the idea of taking the same boat with you, just for the fun of it. If I get over there and discover that I am not prepared to stay indefinitely, I'll take a fast boat back and start all over."

"How convenient it is to have money!" he sighed, smiling.

"You'll be like that some day," she said confidently. "But there is no sense in our standing here like this. I must see that Tills gets out of the studio before noon, and then for a pleasant, luxurious week. Do you like the water?"

"I think I do," Peter grinned, "but I've never before been out where it is so deep even as this."

She turned away, then hesitated. "Shall I arrange with the dining room steward to put us at the same table?"

"Why, of course. No sense in two good friends, stranded at sea on the same boat, sitting at different tables and wishing for congenial company. Or wait. I'll arrange for it myself," he suggested on second thought. "I would look better for Avis if he sought her companionship, via tips to the steward."

"Fine?" Avis agreed, and reflected that it might be better to arrange for the information to reach Camilla that Peter had hired a dining room steward for a table with her. One could not imagine a man falling more neatly into her plans than Peter had from the beginning. True, it was a slow and tedious campaign, but well worth the time and patience. "See you at dinner, then," she left him gaily.

For two days' notice, Avis' trunk contained a surprising collection of stunning clothes, which might have been purchased for a definite purpose. She might have been on her honeymoon, so alluring she made herself for every day and every occasion of that voyage.

By the third day, it seemed quite natural for them to face each other across the breakfast, luncheon and dinner table, with deck games, contract bridge in the salon, dancing in the evenings or just sitting idly side by side in their deck chairs in the calm, indolent hours between activities.

Peter was seized by a spell of inertia, so easily developed aboard a steamer, and following the strain of busy days over many months—years, in fact. It was the first time he had relaxed from anxiety and work for as long as he could remember. It was so blissful to stroll idly around or lie in a deck chair with eyes closed and caressed by the warm salt breeze, to dream without doing and to plan without action. Avis had convinced him of the wisdom of such a week of idleness. On the second day out, he had protested when she proposed a set of deck tennis.

"But I should be working, Avis. I expected to get a lot of extra things done this week."

"Aren't you the bear for work though? Now let me tell you what would be the sensible thing for you to do, Peter. Make this week a real vacation. Forget everything except rest and a good time and be ready to leap into Paris in full swing with new ambition. You certainly deserve one week away from your work while at the same time it would do you a vast amount of good. You must learn to play a little." She was so anxiously concerned for his welfare that he felt a responsive desire to leave her wishes, even while he acknowledged that she probably was right about it.

## HOLDS FALSE TEETH TIGHT AS CEMENT

Plates can't possibly slip when you sprinkle on Dr. Wernet's Powder. Largest seller in world—holds plates so tight they can't wobble yet so comfortable they actually feel and act like your own. Keeps mouth sanitary, breath pleasant, special comfort-cushion preserves sensitive gums from getting sore. Small cost—any drugstore.

It was that receptive mood induced by his complete resignation to idleness and pleasure into which Avis subtly sowed her seeds of intrigue that sprouted and flourished into a lusty romance which promised to bud and blossom.

By the third day, Camilla and America seemed vague and remote as to time and space; and Peter was luxuriating in the charm of Avis' gentle flattery, the pleasure of her gay, irresponsible manner, so different from Camilla's harrying confinement to work and ambition and obligation.

Avis captivated him in this period of lassitude and pleasure as she never had done in the atmosphere of work and ambition at the studio. She was part of this life which had seemed so unattainable to him, and she made him feel that he had only to reach out his hand and grasp it.

And although the Bolgrade was not the epitome of luxury and service to which she was accustomed, it seemed magnificent to Peter who had had so little ease and beauty in his life.

If Camilla's ambition had inspired him and provided him confidence, Avis' holiday mood stimulated his desire to obtain what he wanted by the shortest route, to forgo an ounce of proud struggle for a pound of easy victory. It wasn't so much her words and actions, as her manner and the way her very thoughts vilified him to her viewpoint.

There was also a full golden moon in conspiracy with wind-blown, unlighted decks in her favor. Sitting side by side, snuggled into steamer rugs, with the vastness of the heaving sea stretching about them in all directions to remind them of the insignificance of man, of the futility of waiting for life while life passed by talking in intimate tones while the silver sheen of the moonlight and the eerie sound of the waves against the hull of the boat turned it all into a world of make-believe. Prosie life lost its proportion of importance. It was a mood in which men tell themselves that at this moment, this hour, is his to do what he will. Why wait for that which never may be, and remember that which is lost to time forever?

The lure of the present is sweetly intoxicating to one partakes of more and more.

(To Be Continued)

## Novel Heating System

Specialty-Treated Wallpaper Is Invention of London Scientist

Heating system of novel design has been invented by a London scientist—working on the principle that the human body is always radiating heat to colder objects. He has invented a system which will raise the temperature of any room as high as that needed for human well-being. This will be done by specialty-treated wallpaper connected to the electrical system.

Peter was seized by a spell of inertia, so easily developed aboard a steamer, and following the strain of busy days over many months—years, in fact. It was the first time he had relaxed from anxiety and work for as long as he could remember. It was so blissful to stroll idly around or lie in a deck chair with eyes closed and caressed by the warm salt breeze, to dream without doing and to plan without action. Avis had convinced him of the wisdom of such a week of idleness. On the second day out, he had protested when she proposed a set of deck tennis.

"But I should be working, Avis. I expected to get a lot of extra things done this week."

## New White Star Liner

To Be Fitted With The World's Largest Ship's Propeller

The world's largest ship's propeller has left London for Clydebank. This propeller was the first of four specially designed for Number 534 and it was shipped by the steamer "Copeland" to the Clyde where it will be fitted to the liner.

With an approximate weight of 35 tons and a spread of nearly 20 feet from tip to tip of its Manganesse Bronze blades, its shipment occasioned a great deal of ingenuity and skill. Carefully wrapped in a protective covering of sheet iron and canvas it was hoisted on board the "Copeland" in the "Hercules," one of the largest and most powerful cranes used by the Port of London authority.

Before the propeller reaches the Clyde it will make a sea journey of nearly 600 miles. To ensure that the propellers will reach the shipyard in absolute safety, they are being shipped one at a time.

A start has been made at Clydebank in painting the hull of Number 534 for the launching ceremony. When the tens of thousands of spectators assemble at Clydebank to witness the launch they will see that the huge bulk of the ship presents a glittering appearance of light grey and red. The upper part of the hull will be a light grey, whilst the under-sea part will be red. Dividing the two will run the white "waterline" of the great vessel.

Scores of painters will be engaged in this task during the coming week, many thousands of gallons of paint will be used in completing this striking transformation.

## THE RHYMING OPTIMIST

By Aline Michaels

### KEY TO DREAMS

The keys on my ring are of little worth.  
Leading to things well known;  
But here in my hand I hold a key  
Found on a paving stone.

Somewhat small for a gate, yet large for a door,  
Too long for a sailor's box;  
I turn it in my palm again  
And wonder what it unlocks.

No symbol of all I have seen on earth  
Is as potent as this to me,  
And I have no words for the strange  
allure  
Which lies in the unknown key.

Perhaps it might lead to a garden-plot,  
A hidden and lovely place;  
It might open a door to a foreign land  
And show me a dreamland of fate.

And never, as long as I can clasp  
Closely this time-stained key,  
Will the gates of romance again be closed,  
Or the door of dreams for me!

### To Safeguard Drivers

Authorities May Stop Unofficial Testing Of Racing Cars

Now that the trial of Kaye Don has ended, it is stated in British racing circles that the authorities will decide to prohibit the use of racing cars and racing motorcycles on the roads out of official practice hours.

Kaye Don was sentenced by December 1st to four months' imprisonment for the manslaughter of his mechanic, Francis Taylor, while practising out of official hours for a car race.

An appeal was lodged and after being in custody for a few hours Kaye Don was released on bail.

The authorities for many years have given a great deal of latitude to the drivers and riders from all parts of the world who come over to take part in the races.  
For both the long-standing motorcycle races and the car races of the past two years there are official practice races, for which the roads are closed. In addition, a tradition has grown up that any driver or rider who wished to make additional trials could do so without any risk of serious consequences.

Narcotine is one of the organic bases or alkaloids occurring in opium, in which it usually exists in the proportion of 10 to 18 per cent.

## BABY'S UPSET STOMACH

Relieved!  
Often a hot weather and occasionally at other times, little stomachs turn sour and acid. "When I notice my sign of sick stomach," says Mrs. J. Alphonse Brown, Boston, "I always give a baby's Own Tablets." They quickly set things right and are very easy to take and give no harm. See common ailments of childhood including teething are promptly relieved with Baby's Own Tablets. 25c a package at drug stores.

## BABY'S OWN TABLETS

## Little Helps For This Week

"I form the light and create darkness; I make peace and create evil; I the Lord do these things." Isaiah 45:7.

"All is God that is, and is to be; And God is good." Let this suffice us still.  
Resting in childlike trust upon His will.

Who moves to His great ends, Whittier.  
—J. G. Whittier.

This then is of faith, that everything which touches us in mind, body or estate, whether brought about by this outward senseless nature or by the will of man, good or bad, is overruled to each of us by the all-holy and all-loving will of God. Whatever befalls us, however it befalls us, we must receive as the will of God. If it is through man's negligence, or ill-will, or anger, still it is to us in the very least circumstance the will of God. For if the least thing could happen to us without God's permission it would be something out of God's control. His providence and love would not be what they are. Almighty God Himself would not be the same God, nor the God we believe, adore and love.—E. B. Pusey.

## Can Recommend Canada

Earl Of Chichester Thinks It Fine For Young People

The Earl of Chichester, who sailed to England after spending seven months in the office of Sir William Clark, British High Commissioner, in Ottawa summed up his views of Canada before he sailed as follows: "If I were asked by a young man just out of school, I should certainly recommend Canada, but I should also point out that he would have to work hard. Canada is undoubtedly a country for a young man, but he'll have to work."

Mr. E. Buhr, who had the misfortune to be hit in the eye with flying glass when a piece of gravel hit the windshield of his car recently, is recovering nicely.

Come early September 28th to the Mill Warehouse and secure your supply of Mixed Fruit or Salt.—Didsbury U.F.A. Co-op. Ltd. (38c)

Re-suming activities after the holiday season, Knux, United Ladies Aid will hold a Food Sale and Business Mens Supper in the Church Basement Sat. September 29th, from 5 to 7:30 p.m. (38c)

Mr. and Mrs. J. E. Gooder returned Monday from a two months' visit to England. They found conditions in that country much improved, and the spirit of optimism is evidenced by the large number of new buildings being erected all over the country.

## Melvin Notes

Mr. August Krebs and Lester and Miss Ray motored to Calgary Saturday to see Mrs. Krebs who is in the Holy Cross Hospital. We are pleased she is improving after her operation.

Mr. and Mrs. E. McComb of Calgary called on Mr. and Mrs. C. Youngs Monday evening.

Mr. and Mrs. Bruce Parker spent Sunday with Mr. and Mrs. Leeson.

Mrs. Robt returned Sunday to spend a few months with her daughter Mrs. Greig after spending some time with her daughter Mrs. Phillips of Oids.

Mrs. J. Adam of Springside spent last week with Mr. and Mrs. C. Youngs.

Mr. Geo. Youngs and boys and Miss Dorothy Youngs visited friends at Emeraldale recently.

Mr. and Mrs. Thomas Stubbs and son of Victoria visited their son Mr. and Mrs. Wm. Stubbs. While in Alberta Mrs. Thomas Stubbs had the misfortune to be in a car accident and has been confined to the Lethbridge hospital for some time. We are pleased she is able to be around again although she still uses her crutches.

Mr. and Mrs. Dupont and Mr. and Mrs. Wm. Stubbs and guests spent Sunday with Mr. and Mrs. Peter Johnston.

Mr. James McLaren of Nova Scotia visited with Mr. and Mrs. John Clarke on Sunday.

Miss Sophie Daniels of Calgary is visiting her sister Mrs. Earl Carlson.
